D-SCALE CLEANER – DESCALER - BRIGHTENER

DESCRIPTION

- A none fuming, versatile chemical.
- Coupled with the mild mineral acid is a unique blend of synthetic organic wetting agents & solvents that give superior cleaning, descaling & brightening results to stainless steel, aluminum, porcelain, ceramic tile & similar surfaces.
- D-scale is not effected by temperature changes.

WHERE TO USE

- Suitable for use on a variety of surfaces wherever lime, scale, rust, tarnish or minerals are to be removed.
- Safe to use on all metal & plastic surfaces when used as directed.
- Use to remove heavy deposits & stains from bath tubs, toilet bowls, urinals & other porcelain surfaces.
- Use to remove very stubborn stains from stainless steel.
- Cleans & brightens dull aluminum & stainless steel table tops, counters, utensils & dishwashing machines.

HOW TO USE

- Dosage: 1:40 parts of water.
- For surfaces:
 - Apply by mop, cloth, sprayer or with a high pressure sprayer.
 - Soak for 2 min.
 - Rinse & wipe clean.
- Dish & glasswashing machines:
 - Fill tank just below over flow level.
 - Empty 2L of D-scale into tank.
 - Start machine for 5 min. & drain.
- Coffee machines, ice maker, bain marie:
 - Dilute D-scale 1/60 with hot water.
 - Start machine for 20min then drain & rinse.

INGREDIENTS

- Phosphoric acid.
- Nonyl phenol ethoxylate.

TECHNICAL DATA

Colour	Dark green
Odour	Odourless
pH	1.2
Foam	None
Rinsing	Complete
Storage	Cool Dry place
Fuming Capacity	Non-fuming

SECURITY

Health	Moderate
Flammability	Insignificant
Reactivity	Insignificant
Personal protection	See MSDS
