

## Floor Care

# CLEANER DECAPANT PHASE 1

### DESCRIPTION

- A combination of alkaline solvents that removes rapidly the old ancient layers from soft floors.

### WHERE TO USE

- Soft floors, porous tiles, vinyl, terracotta...

### HOW TO USE

- Diluted:

#### Manual washing

- Dilute 1 lit in 10 lit warm water.
- For deep cleaning of heavy soiled surfaces, dilute in a ratio of 1:5 l water.
- Apply; soak for 5 to 10min.
- Scrub using the brown or black pad
- Remove the solution using a mop or wet dry vacuum.
- Rinse thoroughly.
- Can be used either manually, through single disc or by auto scrubbers.

### TECHNICAL DATA

<b>Colour</b>	White
<b>Odour</b>	Odourless
<b>pH</b>	13.6
<b>Foam</b>	No foam
<b>Rinsing</b>	Complete
<b>Storage</b>	Dry place
<b>Fuming Capacity</b>	Non-fuming

### SECURITY

<b>Health</b>	High
<b>Flammability</b>	Insignificant
<b>Reactivity</b>	Insignificant
<b>Personal protection</b>	See MSDS
