

BACTIMAINS SHA

HYDROALCOHOLIC SOLUTION

BENEFITS

- Colorant and perfume free
- Regular use
- Contains moisturizing agents
- For people who work in aseptic conditions

APPLICATION

BACTIMAINS® SHA is a hydroalcoholic disinfectant solution for hygienic treatment or surgical hand disinfection by friction. Designed for anyone who has to work in aseptic conditions (dental surgeons, doctors, nurses, ...) or enter the operating room and in industrial clean rooms.

The friction technique enables improved adherence to hand hygiene effectively, saving time and reducing the risk of intolerance (more effective and better tolerated than washing). It is recommended especially in an emergency situation, if possible access to a washing station ...

The hygienic hand suitable for an intermediate level of risk.

The surgical hand disinfection is suitable for a high level of infection risk.

INSTRUCTIONS FOR USE

Hygienic treatment of hands:

Rub hands with 4 ml of BACTIMAINS® SHA for 60 sec. until complete drying.

Surgical disinfection of hands:

After simple hand washing, rub hands and forearms thoroughly with 4 ml of BACTIMAINS® SHA for 60 seconds. Repeat the operation 1 time.

CHARACTERISTICS
